Programming Academy

Specialisation in Outsystems

The Information Technology area is increasingly a professional bet. There is a large supply of jobs, related to the increasing automation of tasks, which require greater versatility from professionals, as well as a series of skills that did not exist before.

To boost the number of candidates available for open vacancies in this area, Knower™ Tech has created, in partnership with Header™, the Programming Academy that aims to train professionals who want to become programmers.

Program contents

I. Introduction to Programming and Databases

- a) Information Systems Architecture, Database, XML and UML
- b) Programming Logic and Algorithms
